

Lifeguard PowerCraft Ocean Rescue Award (LPCORA)

The **Lifeguard PowerCraft Ocean Rescue Award (LPCORA)** covers knowledge, skills and understandings for water powercraft used by professional ocean lifeguards in a workplace that is predominantly an open water beach environment.

The Lifeguard PowerCraft Ocean Rescue Award (LPCORA) captures both of the otherwise separate Professional Ocean Lifeguard Awards **PWC Driver Award (PWCDA)** and **IRB Driver Award (IRBDA)**.

As required for the PWCDA and IRBDA, minimum prerequisites for LPCORA include **current PWC Driver and Boat Driver licences** as well as **currency in the Professional Ocean Lifeguard (POL) Award Annual Proficiency Certificate**.

LPCORA is assessed annually for ocean lifeguards who have attained the nationally accredited unit of competency, ***PUASAR016 Operate and maintain a personal water craft for rescue operations***, to ensure currency of skills are maintained when using water powercraft in ocean lifeguard workplaces.

Professional Ocean Lifeguards with current PWC Driver and Boat Driver licences and yet to attain ***PUASAR016 Operate and maintain a personal water craft for rescue operations*** can also be assessed annually to retain currency in LPCORA.
